(248)-978-8023

Strategy and analytics consulting professional who has years of experience working for billion dollar companies driving bottom line profit realization. Hard skills displayed on a consistent basis include excel/power query, powerbi, and power point. Intermediate skills in SQL, Python and R. Currently contracted through self owned LLC practicing project management and data analytics. Former elite level NCAA division 1 athlete who learned discipline, commitment, and leadership.

Work History

Project Consultant

Texx Chemical Technologies, San Antonio, TX

April 2025 - Current

- Leading the organization through an ERP system transition from QuickBooks to NetSuite including project management, data validation and assisting data migration efforts
- Built 2 custom excel based dashboards to assist logistics and revenue recognition. First report is used to track chemical deliveries and usage rates to assist with scheduling orders. The second tool is a cash flow analysis that is automated from QuickBooks using power query
- Assisted with various other internal business practices and revenue recognition excel tools

Associate Consultant

Insight 2 Profit, Chicago, IL

October 2024 - April 2025

- Practicing project management skills while remaining data SME on complex profit realization projects to improve bottom line profit impact to 2 clients
- Skills leveraged on a daily basis included powerbi, excel, power query, and powerpoint
- Most recently contracted to a 30 week project building a pricing model for a multi-billion dollar company involving a custom python built tree-based price model and realization measurement powerbi dashboards
- One of two analysts promoted to associate from a starting class of fifteen, one of eight promoted of sixty total within the department, and the youngest associate at the company at time of promotion

Business Analyst

Insight 2 Profit, Chicago, IL

August 2023 - October 2024

- Engaged in 5 separate profit realization projects building promotion optimization, financial impact, customer segmentation, and product configuration pricing models that were delivered to clients to boost profits
- Skills leveraged on a basis included model building in excel, dashboard building in powerbi, data transformation, manipulation and analysis in excel, and code review in python
- Responsible for building and presenting client facing powerbi dashboards for data investigation and KPI review, weekly project update power points, and ad-hoc excel tools to assist in analytical practices

Wealth Management and Internal Strategy Intern

Wells Fargo Advisors, St Louis, MO

June 2022 - August 2022

- Worked on strategic projects that bolstered tracking, reporting and analyzation of advisor performance
- Generated 4 decks for navigating Salesforce and Tableau that were utilized by division leaders and executives
- Hard skills displayed on a day-today basis included data transformation, manipulation and analysis in excel, deck building in powerpoint, dashboard building in tableau, reporting and tracking of internal salesforce dashboards
